

Elle Mouton

Backend Software Engineer

ABOUT ME

Backend engineer with 5+ years building production-scale distributed systems. My work spans event-driven microservices serving millions of users and protocol-level upgrades to large, live peer-to-peer networks. I thrive in small, fast-moving teams with high ownership and high engineering standards.

Especially interested in developer tools, AI, and event-driven systems.

PUBLIC APPEARANCES

- **The Chaincode Podcast (2023)**
Simple Taproot Channels on the Lightning Network.
- **Advancing Bitcoin Conference, London (2022)**
Static invoices on the Lightning Network.
- **Connect The World Podcast (2022)**
All things Lightning.
- **Bitcoin Optech Podcast (Oct 2024)**
Proposed updates to the Lightning gossip protocol.
- **Bitcoin Optech Podcast (Jul 2024)**
Adding a BOLT11 invoice field for blinded paths.
- **Bitcoin++ Brazil (2025)**
Technical hackathon judge.

WORK EXPERIENCE

Lightning Labs

Lightning Infrastructure Engineer

2021 – Present

- One of the top contributors to LND, the most widely-deployed Lightning Network implementation.
- Ship protocol upgrades and large database migrations safely across a live peer-to-peer network of thousands of nodes.
- Lead major features on the Lightning Terminal and Lightning Node Connect developer-tooling projects.
- Contributions to the Lightning Network protocol specification.
- Significant optimisations to the Neutrino (Bitcoin light client) sync process.
- Extensive code review on a large open-source codebase.

Luno

Software Engineer

2020 – 2021

- Backend engineer on the crypto-operations team.
- Built event-driven Go microservices handling high cryptocurrency volumes for millions of users.
- Production microservices interfacing via gRPC.

EDUCATION

BSc Electrical & Computer Engineering

2016 – 2019 · University of Cape Town

- Graduated with First Class Honours as top BSc(Eng) student.
- Awarded the prize for the best final-year thesis.

SKILLS

TOOLS

Go, Python, TypeScript, SQL, Git, Docker, gRPC, React, Next.js

DOMAINS

Distributed systems, P2P networks, protocol design, database migrations, code review at scale, CI/CD

SOFT

Leadership, accountability, clear communication, fast learner
